

Advocating energy efficiency with a proverbial approach

Hans Nilsson

Proverb

A brief popular saying that gives advice about how people should live or that expresses a belief that is generally thought to be true

Succinct saying that is in general use and expresses commonly held ideas and beliefs.

Proverbs are part of every spoken language and folk literature, originating in oral tradition.

Often a proverb is found with variations in many different parts of the world.

Uncertainty is normal

*And thus the native hue
of resolution;
Is sicklied o'er with the
pale cast of thought*

*Så går beslutsamhetens
friska hy;
I eftertankens kranka
blekhet över*

*So macht Bewußtsein
Feige aus uns allen; Der
angeborenen Farbe der
Entschließung*

*Ainsi la conscience fait de
nous tous des lâches ;
ainsi les couleurs natives
de la resolution
blêmissent sous les pâles
reflets de la pensée*

MAKING DECISIONS

Standard (neo-classical) rational model

Mind-set(s)

- **System 1 (Fast)** and **system 2 (Slow)** – *Kahneman*
- **Automatic** and **slow** – *Thaler & Sunstein*
- **Experiential** (Holistic, Affective, Associationistic, etc.) and **Rational** (Analytic, Logical, Requires justification, etc.) - *Slovic*

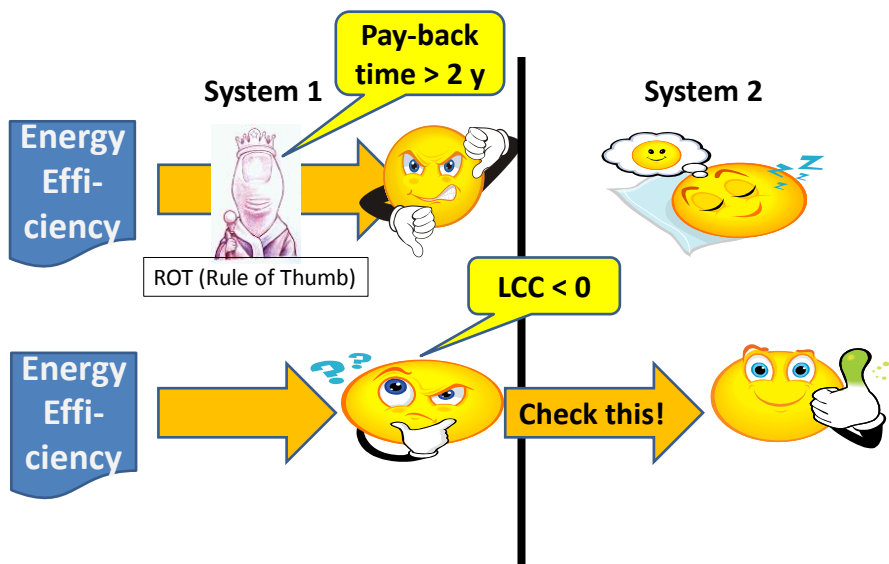

Perception is reference-dependent

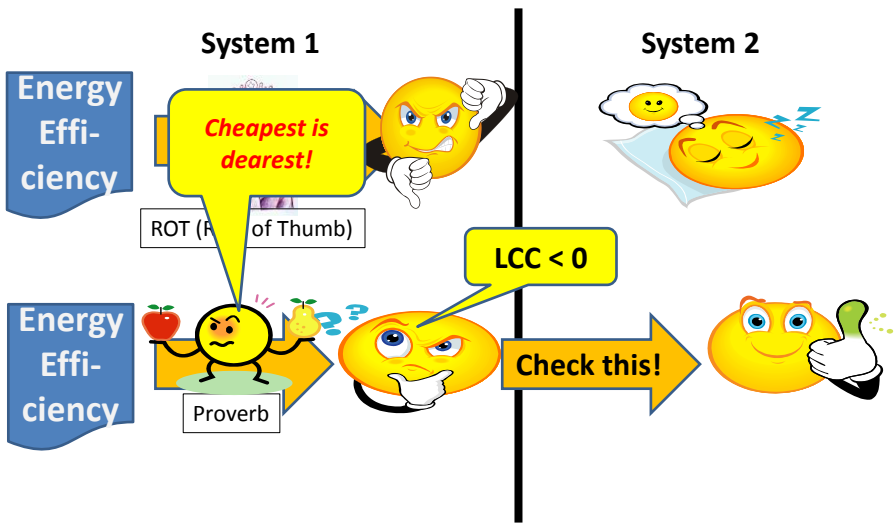

MAKING DECISIONS

Proverbial style 2

1 Overconfidence in limited information

WYSIATI

- **W**hat **Y**ou **S**ee **I**s **A**ll **T**here **I**s
- “It is the consistency of the information that matters for a good story, not its completeness.”

DEMONSTRATION PROJECTS

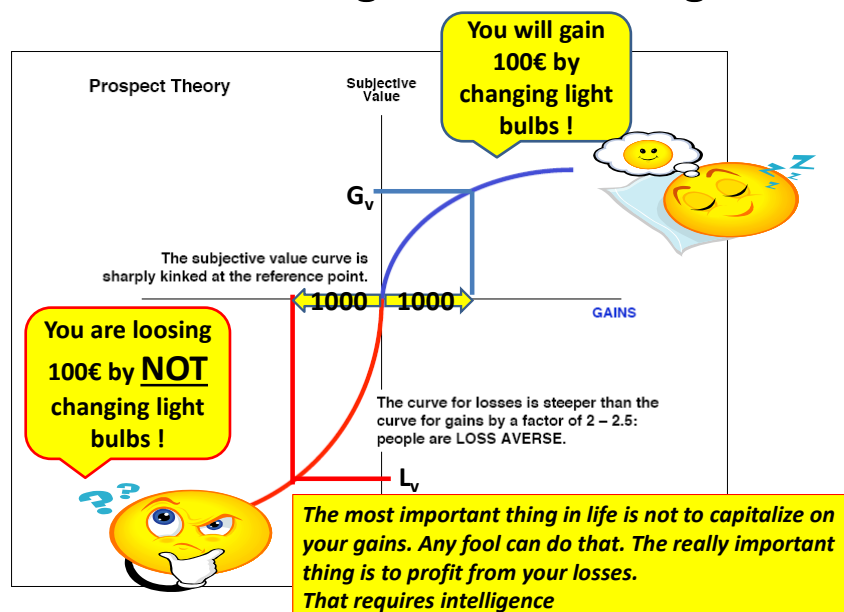

STOP WITH SYSTEM 1

- *Never trouble till trouble troubles you*
- *Don't mend it if it is not broken*

REFER TO SYSTEM 2

- *A stitch in time saves nine*
- *One hour today is worth two tomorrow*

2 Mental accounting of losses and gains

3

Endowment

- PROPERTY
- KNOWN OBJECTS
- KNOWN FUNCTION

REFER TO SYSTEM 2

- *A son can bear the loss of his father but not the loss of his inheritance*
- *All changes, even the most longed for, have their melancholy; for what we leave behind is a part of ourselves*

- *Bird in the hand is worth two in the bush*
- *Better the devil you know (than the devil you don't know)*

Adjustment and anchoring

- Initial information sets the reference for future judgements

Benchmarking shows that we are a bit better than average so we do not have a problem.

- *When a blind leads a blind both shall fall into the ditch*

Choice architecture

- **iNcentives** (who pays/chooses-pays/profits); **What on earth is a kWh? And why is the price fragmented?**
- **Understand mapping** (Choices related to welfare); **what does changing of the thermostat yield in centigrades?**
- **Default** (Opt-in or opt-out); **computer screen-saver**
- **Give feedback** (Understand function); **Plug-out sign or warning lamps**
- **Expect errors** (Foolproof?); **example insert a card 4-ways. Where is the off-button?**
- **Structure complex choices** (Filtering); **Models and features**

Framing of the offers

Source: Nudges by Thaler and Sunstein

UBR vs USP

- **USP** (Unique Selling Proposition): real or perceived benefit of a good or service that differentiates it from the competing brands
- **UBR** (Unique Buying Reason): bottom-up approach that encourages the producer to understand the benefits of the product for its consumers
- Example Non-Energy Benefits (**NEB**), which are they and how big are they?

Conclusion

1. Consider how real people think and how we can get around their hasty first conclusions
 - - *Almost every wise saying has an opposite one, no less wise, to balance it.* George Santayana
2. (Re-)design propositions and make use of "Choice architecture" to frame the offer
 - - *Better a witty fool than a foolish wit.* William Shakespeare
3. Try UBR instead of USP
